

Project Report

Author: Armando Arias-Castro

Class: COP3813 Summer 2021

Professor: Oge Marques

Assignment: Module 3 Project 2-Web Page

The webpage is designed to be an online resume. The webpage content is the same as Project 1, but the design has been upgraded using Bootstrap 5 and more advanced CSS.

Copyrights:

- Page design and layout inspired by <https://startbootstrap.com/theme/resume>
- Footer inspired by <https://mdbootstrap.com/docs/standard/navigation/footer/>

Editor: Brackets and notepad for small changes.

Browsers used to test the webpage: Chrome, Microsoft Edge and Safari. The webpage was also tested in both desktop and mobile browsers.

The HTML5 and CSS codes have been validated. Both were found without errors and compliant with the standards. Validation was provided by the tool in Zybooks:

<https://validator.w3.org/>

All the images used in the webpage are property of the author. No copyrights needed.

The most time-consuming part was the formatting of the elements in the webpage and getting familiar with the classes and tools of Bootstrap 5.
